

- **Discuss plans for upgrading my technology skills**

- Tutorials and videos are a practical and visual way to update your graphic skills and learn new tricks and techniques. You can watch tutorials and videos on various platforms, such as YouTube, Vimeo, or Skill share, that demonstrate how to use different software, tools, or methods to create stunning graphics

- **Mention my relevant courses, certifications, or resources are pursuing**

- I completed Bachelor of Science in Information Technology from harivandana college . Recently I completed Graphic Design in Tops Technology.

- **Share my approach to continuous learning and professional development**

- Professional development often entails a formal training process such as attending a conference, seminar, or workshop or taking a course at a college or university.
